

## Help sheet for Year 6 maths

June 22<sup>nd</sup> to 26<sup>th</sup> 2020

Before you start, look carefully at the Knowledge Organiser – remember to keep using it to help you through the week! For each of these sheets, there are two sets on a page so only do one (!) and the questions get harder as you go down – hopefully most of you can get to the second set at least.

Monday – 1	Have your knowledge organiser at hand.
Tuesday – 2	Have your knowledge organiser at hand. Just think carefully about which way you are converting – bigger or smaller? Use the conversion diagrams to help. Read the later questions carefully – drawing it might help.
Wednesday – 3	Have your knowledge organiser at hand. Bar models – just write on what you know and what is missing. Go step by step. Can be tricky, but have a go.
Thursday - 4	Have your knowledge organiser at hand. Use the converting diagrams to help.
Friday - 5	Have your knowledge organiser at hand. Remember: if you know 1 stone is 14 pounds, you can times by 14 by 6 to find 6 stones.
