

# Bonfire Night

## Home Learning Challenge

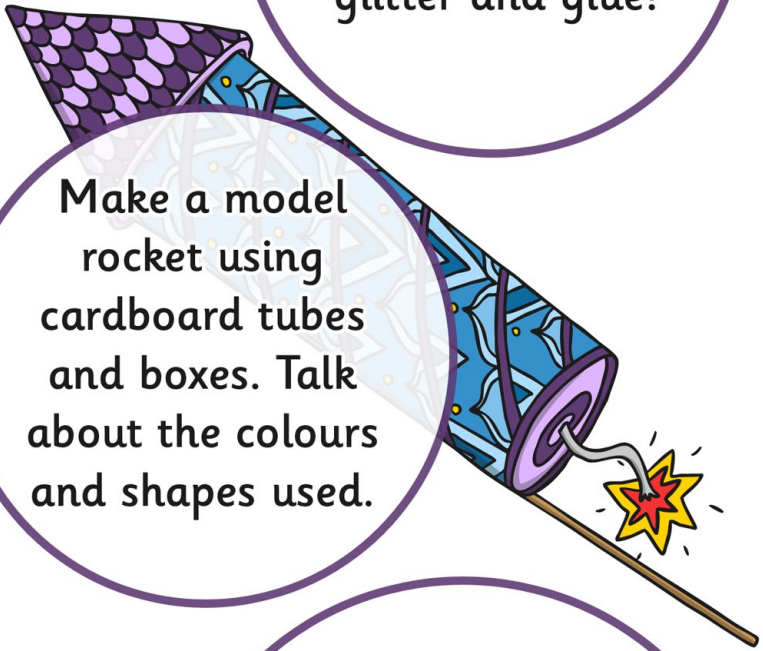

Watch some fireworks together and talk about what you like/dislike, what colours and shapes you saw and the sounds you heard.

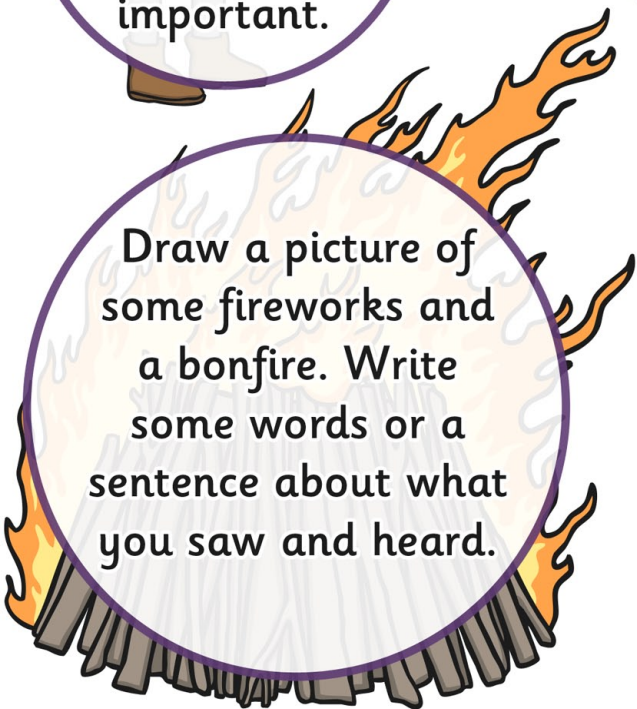

Paint or draw a firework picture. You could use crayons, pens, paint or even glitter and glue!

Talk about firework safety rules and why they are important.

Make a model rocket using cardboard tubes and boxes. Talk about the colours and shapes used.

Draw a picture of some fireworks and a bonfire. Write some words or a sentence about what you saw and heard.

There were 10 rockets in the night sky. If 5 of them go BANG, how many are left? You could draw a picture to help you work out the answer.
